IT Developer

MY PROJECTS

— Present

Quiz Universe,

- A comprehensive web platform for creating, managing, and participating in online quizzes. It features a modern frontend built with React and TypeScript, along with a robust backend API powered by Spring Boot.

— March 2025

Graph Builder,

- A platform that provides visual examples and practical tools to understand graph theory. It offers a variety of resources to explore and master graph concepts and algorithms.

— Present

SportBooking,

- An online sports field booking platform that supports applications for customers, field service providers, and system administrators.

EDUCATION

Jan 2021 - Apr 2026

Student, Can Tho University | Can Tho

- Building a solid foundation in programming through hands-on projects and coding exercises.
- Gaining experience in web development and managing databases to build functional applications.
- Understanding system analysis and design to create efficient and scalable tech solutions.

Jan 2026 - Aug 2026

Ambassador, Google Student Ambassador Program
